

C-Series

CABINET SOFTENERS

Simple compact sizes for installations with minimal space.

Model R110C

Compact design for minimal spaces.

These softeners are a single tank, compact design. Like all Hankscraft Runxin softeners, these can be private labeled and made in many different custom colors. These cabinets come in two compact sizes for units with limited space. The C-series cabinets offer tool free installation and convenient operation. The control valves on these cabinets come ready for long-term memory including multiple, programmable efficiency settings. They also have a 72-hour memory backup in case of a power outage. All of these cabinets feature our patented ceramic disc valve, insuring years of reliability, and maintenance free usage.

When equipped with the F79 valve, our C Series cabinets can use up-flow or downflow regeneration, and has settings for saving on salt and water. These units have an option for vacation mode for extended absences and automatic capacity calculation. When these units are set up with the F116 (RevV2.5) valve, they are NSF certified. These NSF units use only downflow regeneration and have a flow rate of 23 gallons per minute.

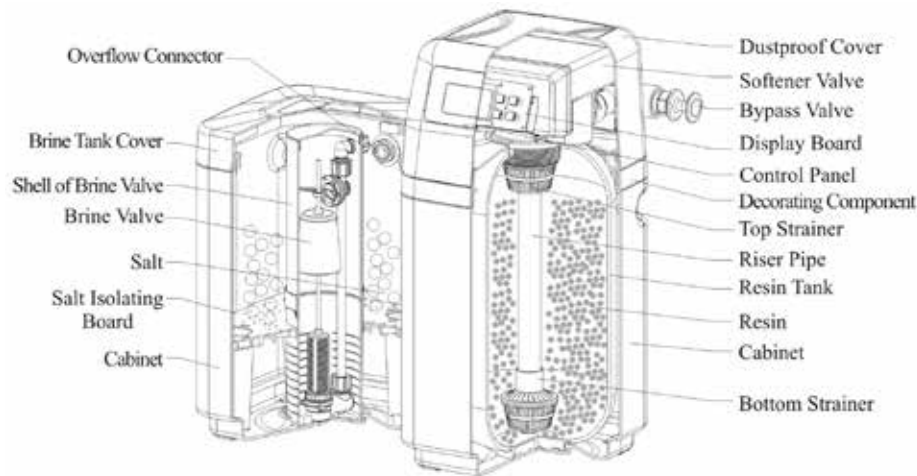

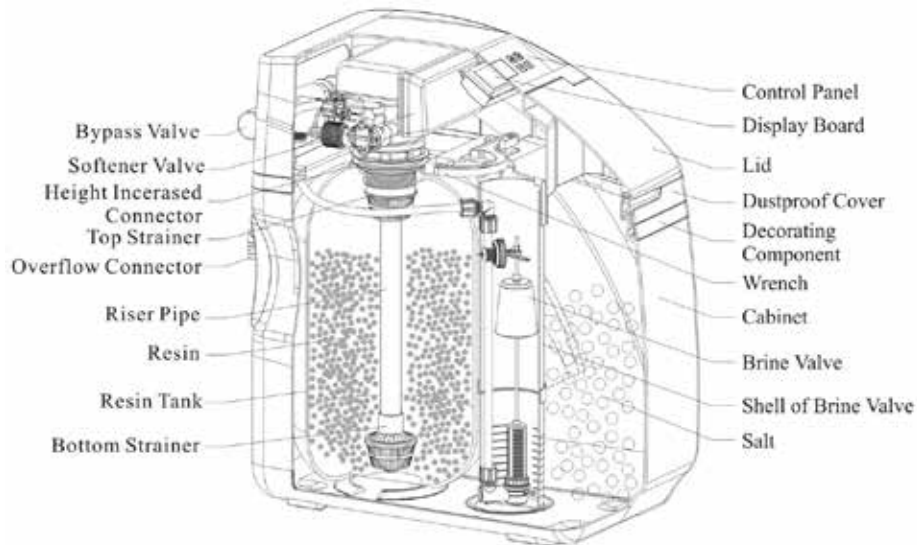

C-Series Cabinets Feature:

- Offered with either valve type
- Two compact sizes for units with limited space
- Low maintenance with built in salt and water saving technology
- Sliding clear dust cover keeps dust out of control unit and brine tank
- NSF is available when ordered with the F116 valve
