

S-Series

WiFi Cabinet Softeners

The most innovative and advanced water softening system in the industry.

Most advanced water softening system for residential use.

A sleek design and ease-of-use sets our new S-Series Cabinet Softeners apart from the competition. These cabinets come in 2 sizes- 32,000 grain treating 1800 gallons between regenerations for residential homes, and 14,000 grain treating 660 gallons between regenerations for smaller apartments, Both of these cabinets feature our patented ceramic disc valve, insuring years of reliability, and maintenance free usage.

S-Series

WiFi Cabinet Softeners

All ceramic components guaranteed for life.

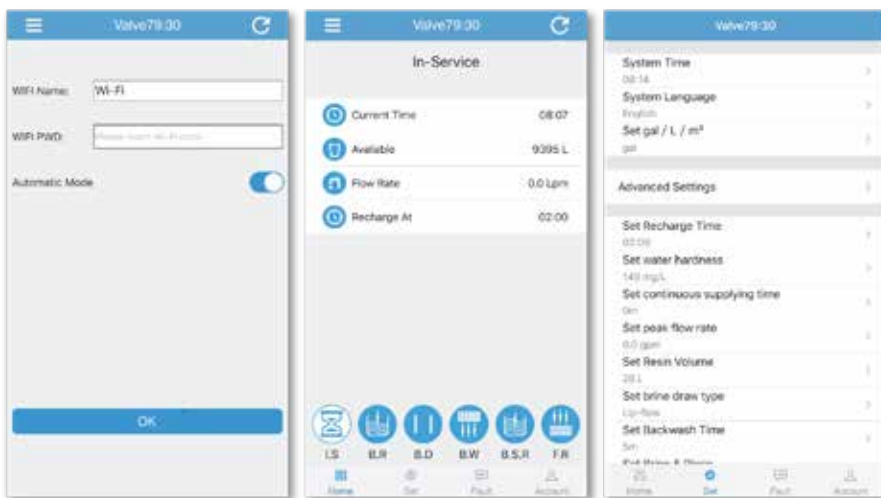

Our S-Series Cabinet Softeners can be managed on your smartphone or device. Simply download the app to your device, select the "RUNXIN" app, then register and login to pair your device with your softener control valve.

Using our intuitive interface you can configure the settings for your softener and monitor it's levels and activity.

Benefits of remote monitoring:

- Monitor water usage
- Program more accurate settings
- Fine tune for personal use
- Save on water and salt waste
- Regenerate system based on use
