SHOWER SOFTENING UNITS

## Automatic Multi-Regen shower softening units.

The automatic regeneration of the multi-regen softener is a meter type and only needs a setting of the local hardness to automatically regenerate. Based on that hardness, the machine will calculate the amount of water that will exhaust the resin's ionic property. When that consumption level has been reached, this machine will automatically begin regeneration as needed. This type of system can get up to six regeneration cycles each time the salt is reloaded

M6A3

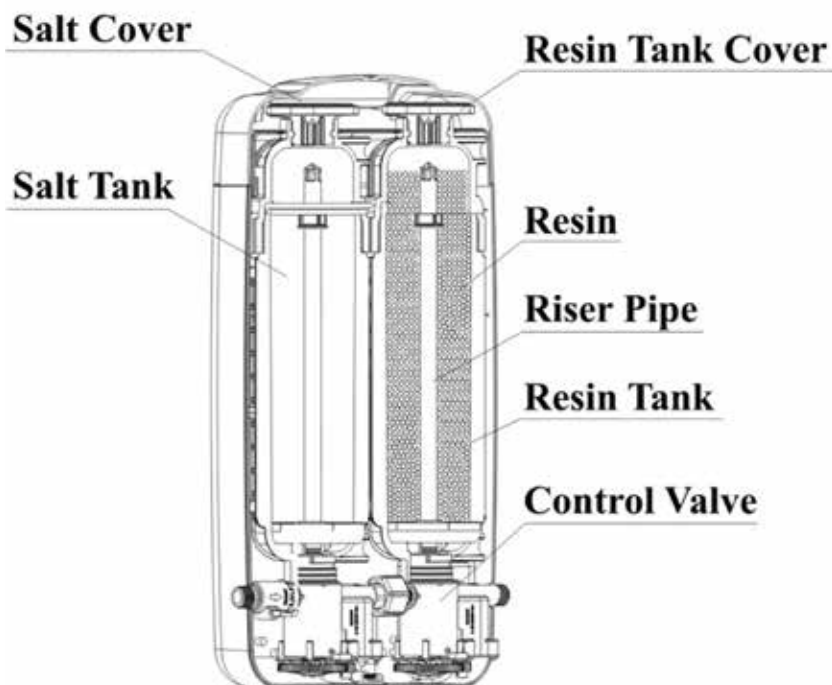

M6B3

## Multi-Regen shower softening units feature:

- Separate structure of salt and resin tank allow for 6 regenerations for each load of salt
- Dynamic regeneration mode allows for more water treatment capacity and savings on salt and water
- Intelligent automatic regeneration and low salt alarm
- Reminders for new regeneration cycle by time or by meter optional
- Data saved after power off

SHOWER SOFTENING UNITS

Model	RL-R50/M6A3 and M6B3
Tank Size	5" x 12"
Resin Volume	.124 f <sup>3</sup>
Capacity	234.8 gal. (900L)
Salt Consumption	14 oz. (per regen)
Total Salt Use	1456 gal. (8.8LB salt)
Max Regen	6 times
Inlet/ Outlet	G 1/2
Dimensions	24"H x12.4"W x 6.7"D
* All data based on testing with 11.7 gpg hardness
