

S-Series

Cabinet Softeners

Leading the way in Advanced Ceramic technology for water treatment.

Most advanced water softening system for residential use.

A sleek design and ease-of-use sets our new S-Series Cabinet Softeners apart from the competition. These cabinets come in 2 sizes- 32,000 grain treating 1800 gallons between regenerations for residential homes, and 14,000 grain treating 660 gallons between regenerations for smaller apartments. Both of these cabinets feature our patented ceramic disc valve, insuring years of reliability, and maintenance free usage.
