

RL-C600A

REVERSE OSMOSIS SYSTEM

WATER PURIFICATION, PERFECTED

The reverse osmosis water purifier system provides clean and safe drinking water with top-of-the-line technology. It's the optimal choice for a range of applications, including drinking water, point-of-use dispensers and refrigerators.

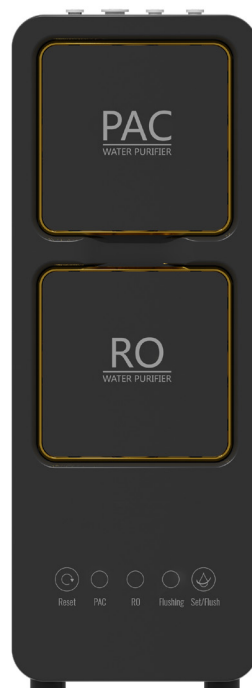

The system uses advanced carbon fiber media to enhance water filtration for superior water quality.

Patented Advanced Ceramic valve components are guaranteed to last a lifetime, ensuring durability and longevity.

Easy maintenance for filter replacement and installation make this system a convenient and dependable choice for water purification.

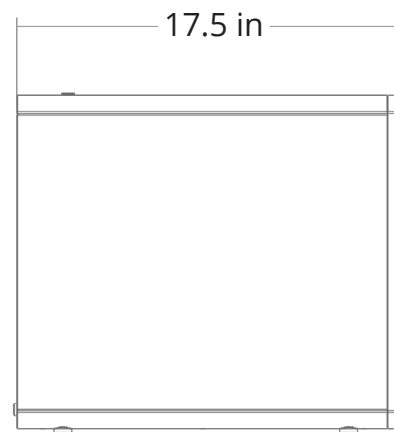

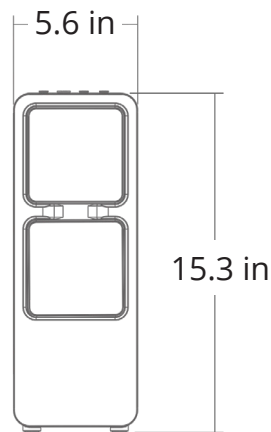

FEATURES

- Long-lasting carbon fiber filters
- Quick and easy maintenance
- Built-in leak detector
- Advanced Ceramic valve components for long product life
- Lifetime warranty on Advanced Ceramic components

RL-C600A

REVERSE OSMOSIS SYSTEM

SYSTEM SPECIFICATIONS

RO Water Production Rate	600 GPD
Carbon Filtered Water Production Rate	.4 GPM
Integrated Booster Pump	Yes
Membrane Flush	Yes
Leak Detection	Yes
Faucet	Dual Output
Product Size	17.5 x 5.6 x 15.3 in

Water Source	Tap Water
Inlet Water Pressure Range	15-18 PSI
Environmental Temperature Range	40-104°F
Water Temperature Range	41-100°F
Rated Voltage	100-240 VAC
Rated Power	120 W
